

Creating a 90 Day Free TIDAL Account

You use a redeem code to create a new TIDAL account.

The code is generated if you create a new TIDAL account (it is not applicable to existing accounts) from the "Create New Account" option in the Naim app using a Naim Streamer that has not previously been used to create a TIDAL account (only one free 90 day trial can be obtained per Naim streamer) ...

You should select the TIDAL input on the App and then hit the "Create Account" button at the bottom of this page:

...and you should then be redirected to a web page that looks like this where you then hit the "Redeem" button.

You will then be taken to the TIDAL account creation pages with that code in place where you will need to create a new account which includes entering valid payment details for after the trial period expires.

NOTE : If a product has already been used to create an account then a redeem code will not be generated.

NOTE : You cannot apply the 90 day free trial offer to an existing TIDAL account.
