

DR Upgrades – Changes from 1st September 2019

Our acclaimed Discrete Regulator Technology was first introduced in 2012, and features across a range of products from power supplies and amplifiers, up to our flagship Statement.

Since its introduction, and in keeping with an ongoing commitment to the sustainability of Naim hi-fi, we have offered upgrades to the DR spec from previous, non-DR versions of Classic and 500 Series products.

Our commitment to offer DR upgrades to these older models continues, but from 1st September 2019 we will no longer do so without the products also going through a full service, to ensure consistent performance and maximum reliability. This involves replacing electronic components, such as capacitors, that benefit from being refreshed over time. These new Serviced Upgrade packages will only be available through our specialist retail partners, at the prices detailed below.
