Naim have channelled over forty years of British audio engineering excellence into Mu-so®, a range of wireless music systems offering versatile features, stunning design and sound that has to be heard to be believed.
Every Naim product is conceived, designed and engineered entirely in service of the sound, revealing a pure experience of music that is as close as possible to its original live source.

We believe that the exploration of sound is an adventure that rewards you with a clarity and connection that becomes more powerful the deeper you travel within it.

The journey through Naim begins with Mu-so - our entry level range of all-in-one wireless music systems. Finely tuned by specialist engineers, the Mu-so family combines all our expertise in streaming, amplification and speaker technology to deliver exceptional sound quality and a class leading feature set, defying size and convention.

Naim. Go Deeper.
At the heart of Mu-so sits an active arrangement of amplifiers inspired by the technology we developed for Bentley Motors. These drive our custom-designed speakers to offer a staggering sound that defies size – Mu-so Qb delivers 300 watts while Mu-so packs 450 watts of incredible sound.

However, power means nothing without control. That’s why Mu-so features a 32-bit digital signal processor capable of millions of calculations per second. It’s the audio brain of each of the systems, controlling software that’s been fine-tuned by engineers in our listening room. It means that every last drop of performance is extracted from your music.

From the aluminium heat sinks (that also house built-in antennae), to the touch panel control and illuminated base – every component used in Mu-so has been considered and refined. The end result is a range of wireless all-in-one systems that deliver an unbelievable sound.
Unleash your music, wherever it's stored...

Connect Mu-so or Mu-so Qb to your network via Ethernet or Wi-Fi to open up a world of music. Wirelessly stream in breathtaking high-resolution via UPnP™ and AirPlay or browse and play millions of songs through Spotify® Connect, TIDAL or Internet Radio.

Mu-so and Mu-so Qb are complete music centres. They also feature a high quality Bluetooth® (aptX®) audio connection, USB input for charging and playback of smart phones, tablets and MP3 players, a 3.5mm analogue input, and a digital input for TVs, set-top boxes and games consoles. It couldn’t be easier to connect to your system.

Features

- **Spotify® Connect**
  Native support for Spotify to stream millions of songs from your portable device.
- **AirPlay**
  Stream music from your iPhone, iPad or iPod touch or from iTunes and Apple Music.
- **Bluetooth® (aptX®)**
  Pair with a Bluetooth device to instantly play your music. Also compatible with aptX for high-performance audio where supported by the device connecting to your system.
- **Multiroom Ready**
  Play music between any combination of Mu-so, Mu-so Qb and other Naim streaming systems in up to five rooms of your home. Choose the same song in beat-perfect sync or play different music in different rooms all via the Naim App.
- **TIDAL**
  The lossless streaming service is integrated into the system for an immersive, high-quality sound experience.
- **USB**
  Play music from your iPhone, iPad or iPod and other MP3 players and USB sticks.
- **Internet Radio**
  Access thousands of internet radio stations and save your favourite presets for easy access.
- **UPnP™ Streaming**
  Stream music from a PC, Mac or network-attached storage in high-resolution ‘better than CD’ quality.
- **Analogue Input (3.5mm)**
  A built-in stereo jack socket connects Mu-so to any of your devices, TVs and other audio equipment, such as turntables or CD players.
- **Digital Input (Optical)**
  Boost audio from digital sources such as TVs, set-top boxes, CD players or games consoles.
- **Loudness Control**
  Intelligently boosts bass and treble to give you a full musical experience whatever volume you choose.
- **Room EQ Settings**
  Choose from two different settings to optimise the Mu-so sound. Tailor your listening experience whether your unit is close to or away from the edge of any room.
Under the skin of Mu-so of Naim

All-in-One Systems
Mu-so Wireless Music System

Under the skin of Mu-so...

The original Naim wireless music system delivers 450 watts of audio power. It’s the result of our hi-fi engineering heritage and a long line of award-winning systems.

For all its advanced technology and intricate audio engineering, Mu-so is incredibly easy to connect. Link your smartphone, tablet or computer to enjoy streaming services like Spotify or TIDAL, play 1000s of internet radio stations, and link all sorts of devices via Bluetooth or any of the system’s connection ports. However you use your Mu-so, everything is easily controlled via the Naim iOS and Android App.

The whole system is powered by a 32-bit digital brain that drives six custom-designed speakers for a sound like no other. Every element of Mu-so is designed for the ultimate wireless speaker experience.

**Engineering**

1. **Bass Reflex System**
   Two large custom bass drivers are supported by a sophisticated porting system with an outlet at the end of the cabinet. It was carefully designed to move large volumes of air with low turbulence for richly textured, low distortion bass and treble.

2. **Acrylic Base**
   The whole Mu-so cabinet sits on an illuminated base of high-grade acrylic which provides the foundation for the electronics and speakers to shine.

3. **DSP**
   The Mu-so audio brain is a 32-bit digital signal processor with software fine-tuned by our engineers in the listening room. It controls the flow of music information to each speaker and benefits from the developments we made in designing the best in-car audio systems for Bentley Motors. Two EQ settings tailor sound for close to and away from room boundaries for superb sound quality anywhere in your home.

4. **Silk Dome Tweeters**
   Silk dome tweeters were chosen through listening tests to replace the traditional metal cones found in many wireless speakers for their benefit to sound quality.

5. **Mid-Range Drivers**
   Custom mid-range drivers provide crystal clear speech and emotively powerful vocals. We found through tests that positioning them as the outermost driver aided even sound dispersion.
A deeper look at Mu-so Qb

Mu-so Qb shares the same design DNA as Mu-so, all intuitively crafted into a compact cabinet...

It’s alive with contours and features, but with five custom-designed speakers and two pistonic passive bass radiators, it’s never restricted by its size. In fact Mu-so Qb delivers 300 watts of incredible sound.

At the heart of Mu-so Qb is a 32-bit digital signal processor that controls the flow of music information to each speaker for true Naim sound. And with several ways to connect the system, which can be controlled in the Naim iOS and Android app, the options for playback are vast.

Mu-so Qb is a compact wireless speaker system and a true feat of audio engineering. It delivers a sound that’s unmistakably Naim and has the ability to unmask your music.

Engineering

1. Passive Radiator System

Mu-so Qb has two passive radiators. They work in conjunction with a custom-made woofer that’s driven by a 100W amplifier to create astonishing low frequencies.

2. Acrylic Base

The whole cabinet sits on an illuminated base of high-grade acrylic that provides the foundation for the electronics and speakers to shine.

3. Custom-Built Tweeters

Our audio engineers installed microfibre dome tweeters for their stiffness and dampening qualities.

4. Mid-Range Drivers

Custom mid-range drivers provide crystal clear speech and emotively powerful vocals. They’re also carefully positioned to evenly disperse sound.

5. DSP

Mu-so Qb is controlled by its audio brain – a 32-bit digital signal processor with software fine-tuned in our listening room. It controls the flow of music information to each speaker, drawing on everything we’ve learned from designing the best in-car audio systems for Bentley motors. It also includes two EQ settings, tailoring the best sound quality whether the unit is close to or away from the edge of any room.
Simple Set-up

Step 1. Plug in your Mu-so or Mu-so Qb.

Step 2. Download the Naim App for iOS and Android.

Step 3. Connect to your home network via Ethernet or Wi-Fi.

Step 4. Play your music.

Play your music
in up to five rooms...

Imagine listening to Coltrane in the kitchen, while Vivaldi lights up the lounge and Neil Young kills it upstairs. Imagine playing the same song in every room of your home in beat perfect sync. Or filling your entire living space with hi-fi quality and that classic Naim sound. Multiroom lets you do all this and more.

It’s simple to connect your Mu-so to other Mu-so or Naim systems using a Wi-Fi or Ethernet connection. And everything is controlled at your fingertips via the Naim iOS and Android app. You can seamlessly sync up to five units by hitting Party Mode and play the same song across all systems – our app lets you change volume across all units at once for complete control. Or you can choose to play different songs in any room of your home to create different moods and musical atmospheres.

Intuitive control for every room, all in one place.

Your home, alive with music

Bring your music to life in your kitchen or office with Mu-so Qb...
Take control of your music

Control all of your music from one place with the Naim iOS and Android app...

The app is simple to set up and puts millions of songs at your fingertips in no time at all. Carefully designed by our software engineers, our app helps you browse your music in new ways and allows you to go deeper by exploring information on artists, discographies, biographies, reviews, image galleries, and related songs - all thanks to Rovi’s vast online music database (iOS only).

There’s also all the usual functionality you’d expect – adjust volume, skip, pause and play tracks, scroll through album art, create playlists and store favourite radio stations to be easily accessed later.

More colour to your music

Customise your Mu-so with a selection of vibrant grilles...

Mu-so and Mu-so Qb come with a classic black Naim speaker grille. There are also three additional colours to choose from to help complement your living space and style. Choose from Deep Blue, Vibrant Red or Burnt Orange to make your Mu-so system stand out even more. Plus all our speaker grilles are easy to detach if you want to expose the speaker drivers.

Additional coloured grilles for Mu-so and Mu-so Qb are available to purchase from naimaudio.com (UK) and selected retailers worldwide.
