

superUNITI

all-in-one audio player

**AUDIO OUTPUTS**

Audio Outputs	Speaker output, preamp output (DIN), sub output (RCA)
Signal-to-Noise Ratio	85dB
Power Output	120W per channel into 4Ω, 80W per channel in 8Ω
Digital Output	BNC 75Ω (plus RCA adapter)
Other Outputs	Headphone

**AUDIO INPUTS**

Antenna Inputs	Wi-Fi, F type, (plus PAL adapter)
Analogue Inputs	1 x 3.5mm front-panel socket, 2 x RCA, 1x DIN
Overload Margin	34dB
Input Sensitivity	170mV
Digital Inputs	6 x S/PDIF (1 x coaxial BNC, 1 x coaxial RCA, 3 x optical TOSlink, 1 x 3.5mm front-panel mini TOSlink)
USB Inputs	1 front-panel socket
Other Inputs	Ethernet and iPhone, iPod, iPad (digital via USB socket)

**UPGRADES**

Amplification	External power amplifier
Other	Power-Line, Hi-Line, WA5 antenna

**CONNECTIVITY**

Infrared	Front panel
Remote input	RC5 input (3.5mm rear panel jack)
Remote output	RC5 output (3.5mm rear panel jack)
USB update	Updates only (rear panel USB mini-B)

Windows Media™ is a trademark of Microsoft Corporation.

UPnP™ is a trademark of the UPnP™ forum.

iPod, iPhone, iPad and Mac are trademarks of Apple Inc, registered in the U.S. and other countries.

Please note information provided relating to specification is subject to change.

**FORMATS**

Audio Files Supported	WAV and AIFF (up to 32bit/192kHz) FLAC (up to 24bit/192kHz) ALAC (up to 24bit/96kHz) Windows Media-formatted content (up to 16bit/48kHz) must be WMA 9.2 Ogg Vorbis (up to 16bit/48kHz) MP3 and M4a (up to 320kbit/s)
Playlists supported	M3U and PLS

**USER CONTROL INTERFACES**

Front-panel	Volume control, logo mute and buttons
Handheld	Remote handset included and optional n-Stream app for iPad, iPhone and iPod Touch from App Store
AMX & Crestron	Installer-customisable reference apps available

**POWER**

Supply Voltage	100V, 115V, 230V; 50/60Hz
Power Consumption	400VA (maximum)

**OTHER**

Tuning Range	FM 87.5 - 108Mhz DAB Band III and L Band
iRadio Service Provider	vTuner 5* full service

**PRODUCT CERTIFICATIONS & LICENSES**

Certifications	Apple (Made for iPhone), vTuner Premium
Licenses	MP3, AAC, DAB

**PHYSICAL**

Dimensions	87 x 432 x 314mm (H x W x D)
Weight	12.8Kg

# superUNITI

## Reference all-in-one player

### High-end audio meets single case audio

There's a convention in high-end audio that says only separates can reach genuine high-end performance. Well not anymore. The NaimUniti showed just how much audio performance and versatility could be housed within one stylish encasing. Now the SuperUniti takes the concept still further to tear-up the rule book and play with the big boys.

"All-in-one" doesn't just mean an integrated amplifier and a couple of integrated sources. SuperUniti genuinely can do it all. Take a deep breath because listing its talents takes a while. SuperUniti is an integrated wireless UPnP™ network stream player, USB audio player, iPod, iPhone and iPad dock, internet radio, DAB radio, FM radio, ten input digital and analogue preamplifier, digital to analogue converter, and stereo 80 Watt power amplifier. And just so that you don't lose track of time while listening - easily done - it has an alarm clock too. Out of breath?

SuperUniti might well contain all the audio versatility you'll ever need, but audio versatility is nothing without musical ability, and that's where four decades of Naim audio expertise comes in. Not only does SuperUniti do everything, it does it all with brilliant clarity and heart-stopping emotion. Every musical source, from internet radio via analogue inputs through to digital streams, is played with genuine musical quality. Every drop of music is squeezed from every stream of data – whatever its provenance.

### The SuperUniti high-end pedigree

It isn't just SuperUniti versatility that is, "all-in-one". SuperUniti also pulls together a collection of high-end core audio technologies borrowed directly from Naim high-end products. The SuperUniti power amplifier module comes from the SUPERNAIT integrated amplifier. Its digital audio hardware is drawn from the NDX network player; the World's first upgradeable audiophile streaming source. Its digital to analogue conversion technology, including the innovative data buffering jitter removal process, comes courtesy of the Naim DAC. SuperUniti is a high-end audio technology "all-in-one".

SuperUniti is not limited by audio file source, format or resolution. It can stream audio files, including iTunes libraries, stored on a computer or on network storage, via UPnP™. It can play all common, and some not so common, audio file and stream formats: WAV, FLAC, Apple Lossless, AIFF, AAC, MP3, M4A, Windows Media-formatted files, LPCM and Ogg Vorbis. And where the file format supports high resolution, SuperUniti can make the most of 24bit/192kHz data. SuperUniti also recognises M3U and PLS playlists formats and supports gapless playback on all supported formats.

Crowding so much audio technology in one place brings numerous challenges of component selection, circuit and component layout, power supply noise and microphony. Meeting such challenges however is second nature at Naim Audio and the expertise that brings solutions has long been part of the company's audio engineering culture. SuperUniti is a masterpiece of audio technology packaging.

Along with drawing from the best existing Naim technologies, SuperUniti introduces a new technology of its own. Behind the traditional looking volume knob lies an innovative new digital control technology providing noise-free digital volume adjustment that intuitively varies its operating characteristic depending on how quickly the volume knob is turned.

Upgrade potential has long been a central philosophy behind the Naim approach to music in the home. Despite its integration, SuperUniti embraces that philosophy with a preamplifier output that enables an external power amplifier, perhaps the classic NAP 250, to be used to provide even more high-end musical performance.

### Integrated with life

The SuperUniti can integrate seamlessly into your home. Its wireless and network capabilities mean it can communicate with other UnitiSystem products, like the UnitiServe CD-ripping hard disk music player / server or the UnitiQute compact all-in-one player, to create a multi-room home audio system. SuperUniti integrates with a busy life too. It can be controlled from its front panel buttons, a conventional remote control handset, or wirelessly via the free Naim n-Stream iPad, iPhone and iPod Touch app. And if you aren't quite ready to let go of your CDs just yet, SuperUniti will connect with your existing player through its system automation feature to enable integrated CD control via n-Stream. Never has access to so much audio horsepower been so simple.

### It's all about music

Integration, versatility, technology, streaming, networking – it would be easy perhaps to lose sight of the music. Easy, that is, until you listen. SuperUniti is Naim high-end audio that carries the power to move both the emotions and the hairs on the back of the neck. It just comes in a single elegant enclosure.
